BEECH BONANZA WIRING DIAGRAM MANUAL

LIST OF EFFECTIVE REVISIONS

Always destroy superseded pages when you insert revised pages.

Title Page January 29, 1999
Logo Page
"A" Page E1

PART NUMBER	DATE	CHAPTERS AFFECTED
35-590102-9	March 31, 1978	Original Issue
35-590102-9B	March 21, 1980	Reissue
35-590102-9C	September 11, 1981	Reissue
35-590102-9D	December, 1994	Reissue
35-590102-9E	October, 1995	Reissue
35-590102-9E1	January 29, 1999	Reference Designator Index, Part Number Index, 21, 24, 25, 32, 33, 39 and 91

NOTE: A List of Effective pages will be in the front of each chapter.

E1

Basic publications are assigned a part number which appears on the title page with the date of the issue. Subsequent revisions are identified by the addition of a revision code after the part number. A1 after a part number denotes the first revision to the basic publication, A2 the second, etc. Occasionally, it is necessary to completely reissue and reprint a publication for the purpose of obsoleting a previous issue and outstanding revisions thereto. As these replacement reissues are made, the code will also change to the next successive letter of the alphabet at each issue. For example, B for the first reissue, C for the second, etc.

When ordering a handbook, give the basic number, and the reissue code when applicable, if a complete up-to-date publication is desired. Should only revision pages be required, give the basic number and revision code for the particular set of revision pages you desire.

Beechcraft
BONANZA
WIRING DIAGRAM MANUAL

INTRODUCTION

NOTE

Service Publication reissues or revisions are not automatically provided to the holders of this manual. For information on how to obtain reissues or revisions applicable to this manual, refer to the latest revision of BEECHCRAFT Service Bulletin No. 2001.

WARNING

Use only genuine BEECHCRAFT or BEECHCRAFT approved parts obtained from BEECHCRAFT approved sources, in connection with the maintenance and repair of Beech airplanes.

Genuine BEECHCRAFT parts are produced and inspected under rigorous procedures to insure airworthiness and suitability for use in Beech airplane applications. Parts purchased from sources other than BEECHCRAFT, even though outwardly identical in appearance, may not have had the required tests and inspections performed, may be different in fabrication techniques and materials, and may be dangerous when installed in an airplane.

Salvaged airplane parts, reworked parts obtained from non-BEECHCRAFT approved sources, or parts, components, or structural assemblies, the service history of which is unknown or cannot be authenticated, may have been subjected to unacceptable stresses or temperatures or have other hidden damage, not discernible through routine visual or usual nondestructive testing techniques. This may render the part, component or structural assembly, even though originally manufactured by BEECHCRAFT, unsuitable and unsafe for airplane use.

BEECHCRAFT expressly disclaims any responsibility for malfunctions, failures, damage or injury caused by use of non-BEECHCRAFT approved parts.

NOTE

It shall be the responsibility of the owner/operator to ensure that the latest revisions of publications referenced in this handbook are utilized during operation, servicing, and maintenance of the airplane.

The BEECHCRAFT Bonanza Wiring Diagram Manual is prepared in accordance with the GAMA (General Aviation Manufacturers Association) Specification No. 2. It also meets the intent of the ATA (Air Transport Association of America) with respect to the arrangement and content of the system/chapters within the designated chapter numbering system.

This wiring diagram manual is supplemented by the following publications:

- BEECHCRAFT Bonanza 36 Series Shop Manual P/N 36-590001-3B
- BEECHCRAFT Bonanza Maintenance Manual P/N 36-590001-9A
- BEECHCRAFT Bonanza Parts Catalog P/N 33-590010-7F
- BEECHCRAFT Bonanza Parts Catalog P/N 35-590102-5E
- BEECHCRAFT Bonanza Parts Catalog P/N 36-590001-1G

NOTE

Beech Aircraft Corporation expressly reserves the right to supersede, cancel and/or declare obsolete any part, part numbers, kits or publication that may be referenced in this manual without prior notice.

CORRESPONDENCE

If a question should arise concerning the care of your airplane, it is important to include the airplane serial number in any correspondence. The serial number appears on the model designation placard on the cabin door frame.

Beechcraft BONANZA WIRING DIAGRAM MANUAL

ASSIGNMENT OF SUBJECT MATERIAL

The content of this publication is organized at four levels: Group, System/Chapter, Sub-System/Section, and Unit/Subject.

Group - Identified by different colored divider tabs. These are primary divisions of the manual that enable broad separation of content. Typical of this division is the separation between Airframe Systems and the Propeller.

System/Chapter - The various groups are broken down into major systems such as Environmental Systems, Electrical Power, Landing Gear, etc. The systems are arranged more or less alphabetically rather than by precedence or importance. They are assigned a number, which becomes the first element of a standardized numbering system. Thus the element "28" of the number 28-00-00 refers to the chapter "Fuel". Everything concerning the fuel system will be covered in this chapter.

Sub-System/Section - The major systems of an airplane are broken down into sub-systems. These sub-systems are identified by the second element of a standard numbering system. The number "40" of the number 28-40-00 is for the indicating portion of the fuel system.

Unit/Subject - The individual units within a sub-system may be identified by the third element of the standard numbering system, such as 28-40-01. This number is assigned by the manufacturer and may, or may not be used.

APPLICATION

Any publication conforming to this format will use the same basic numbering system. Thus whether the manual be a BEECHCRAFT Bonanza Maintenance Manual, or a BEECHCRAFT Bonanza Wiring Diagram Manual, the person wishing information concerning the indicating portion of the fuel system, would refer to the System/Chapter tab "28 FUEL". The Table of Contents in the front of this chapter will provide a list of sub-systems covered in this chapter.

For example:

28-00	General
28-10	Storage (Tanks, cells, necks, caps, instruments, etc.)

28-20	Distribution (Fuel lines, pumps, valves, Controls, ect.)
28-30	Dump (If in-flight dumping system is installed it would appear here.)
28-40	Indicating (Quantity, temperature, pressure, etc., does not include engine fuel flow or pressure.)

The material is arranged within the chapter in ascending numerical sequence. The Chapter-System Subject number and page number are found at the lower outside corner of each page.

LIST OF CHAPTERS NON-APPLICABLE TO THIS WIRING DIAGRAM MANUAL ARE INDICATED AS FOLLOWS:

04, 05, 06, 07, 08, 09, 10, 11, 12, 20, 22, 26, 29, 31, 35, 37, 38, 49, 51, 52, 53, 54, 55, 56, 57, 61, 71, 72, 75, 76, 78, 79, 80, 81 and 83.

CHAPTER SYSTEM INDEX GUIDE

The following is a GAMA Spec No. 2 Chapter System Index Guide to be used with this wiring diagram.

SYSTEM CHAPTER	SUB-SYSTEM SECTION
21 - ENVIRONMENTAL SYSTEMS	21-00-00
23 - COMMUNICATIONS	23-00-00
24 - ELECTRICAL POWER	24-00-00
25 - EQUIPMENT/FURNISHINGS	25-00-00
27 - FLIGHT CONTROLS	27-00-00
28 - FUEL	28-00-00
30 - ICE & RAIN PROTECTION	30-00-00

EFFECTIVITY

LIST OF EFFECTIVE REVISIONS

The List of Effective Revisions Page following the logo page of the manual lists the revisions currently effective for the manual.

RECORD OF REVISIONS

A Record of Revisions Page is provided following the List of Effective Revisions ("A") Page. When a revision is inserted, the revision number, the date the revision is inserted into the manual, and the initials of the person(s) inserting the revision should be recorded on this page.

LIST OF PAGES & TABLE OF CONTENTS

The List of Pages & Table of Contents following each Chapter Divider-Tab, lists the issue date of each page that is effective for that chapter, the titles and, if applicable, the effectivity of the circuits covered in that chapter.

SERIALIZATION

The effectivity of each wiring diagram and electrical component part, unless otherwise specified, is the same as the effectivity of the manual as given on the title page. If the effectivity of a wiring circuit is limited, the airplane serials for which the circuit is effective will be noted on the List of Pages & Table of Contents page as a configuration. Specific serial designations are listed at the end of the appropriate equipment list.

WIRING DIAGRAMS

To facilitate locating components and tracing the circuitry of individual diagrams, each wire is identified by the wire code it bears in the airplane. The individual circuit components are identified by a reference designator. Symbols used in the wiring diagrams appear, in figures 2 and 3, in the Introduction of this manual.

OPTIONAL EQUIPMENT

This manual does not in all cases differentiate between optional and standard equipment. In order to

facilitate the installation of certain wire harnesses used to connect optional equipment, these harnesses will be installed in all airplanes. Wires will be dead ended in airplanes that do not require the equipment.

EQUIPMENT LIST

A listing of the component parts accompanies each wiring diagram to aid maintenance personnel in ordering spare replacements. The components are listed in the order of alpha-numeric sequence of the reference designators.

The INSTL ZONE column of the equipment list designates the area of the airplane in which the component is located. A line drawing in the introduction provides a pictorial reference of these zones.

ALPHABETICAL INDEX

An Alphabetical Index, which may be found in the Introduction, is also provided as an assistance in locating the desired circuit. The Alphabetical Index provides the chapter and sub-chapter in which a circuit appears.

REFERENCE DESIGNATOR INDEX

The Reference Designator Index provides a cross reference listed by the reference designator to facilitate locating the component within this manual.

PART NUMBER INDEX

The Part Number Index provides a cross reference listed by the part number to facilitate locating the component within this manual.

MICROFICHE-AEROFICHE

This manual may be obtained in Aerofiche form from your local BEECHCRAFT Authorized Outlet.

REFERENCE DESIGNATORS

A reference designator is a combination of letters and numbers which identify a particular component in this wiring diagram manual. A reference designator is assigned to each component shown on the wiring schematics. Any component found in the schematic can be identified in the accompanying equipment list by its reference designator. An example of a reference designator follows:

CB 101 Is a reference designator for a circuit breaker.

Beechcraft BONANZA WIRING DIAGRAM MANUAL

101 Identifies it as a specific circuit breaker.

ASSEMBLIES-SUBASSEMBLIES

Assemblies are identified on the schematic by the reference designator and the assembly name. The accompanying equipment list displays the reference designator, part number and the assembly name. The reference designator of a component which belongs to an assembly begins with the reference designator of the assembly. A typical example follows:

A16 FLAP RELAY PC BOARD ASSEMBLY
A16K2 RELAY ASSEMBLY
A16K2P1 RELAY SOCKET

Assemblies can be purchased complete and ready for installation or they can be purchased by individual components. In some cases there are more components shown within the outline of an assembly than are actually part of the assembly. Assemblies should be ordered according to the equipment list since it will be more accurate in showing the components of the assemblies. Normally only electrical components are shown in the wiring diagram manual so there may be fasteners and other non-electrical components within an assembly which are not shown herein.

DELTA NOTES

The following "DELTA NOTE" will be found, where applicable, throughout the manual within the schematic:

- ▲1 Circuit breaker changes from PULL to PUSH-PULL on airplanes effective E-1766 THRU E-1945, E-1947 THRU E-2103, E-2105 THRU E-2110; CE-929 AND AFTER; CJ-156 AND AFTER; D-10354 AND AFTER; EA-159 THRU EA-319, EA-321 THRU EA-321.

WIRE CODES

The wire codes used in the BEECHCRAFT Bonanza Wiring Diagram Manual closely follow the military numbering system. Each wire and cable is identified by a combination of numbers and letters imprinted on the wire and cable as illustrated in figure 1. Each wire or cable is identified within 3 inches of each junction. No code is required for short wires or cables less than 3 inches in length. A non-metallic sleeve carrying

identification will appear on wires where imprinted codes cannot be affixed.

Circuit function letters indicate a relationship to a particular system (noted in the list of circuit function designations).

Wire numbers are provided to differentiate between wires in a circuit.

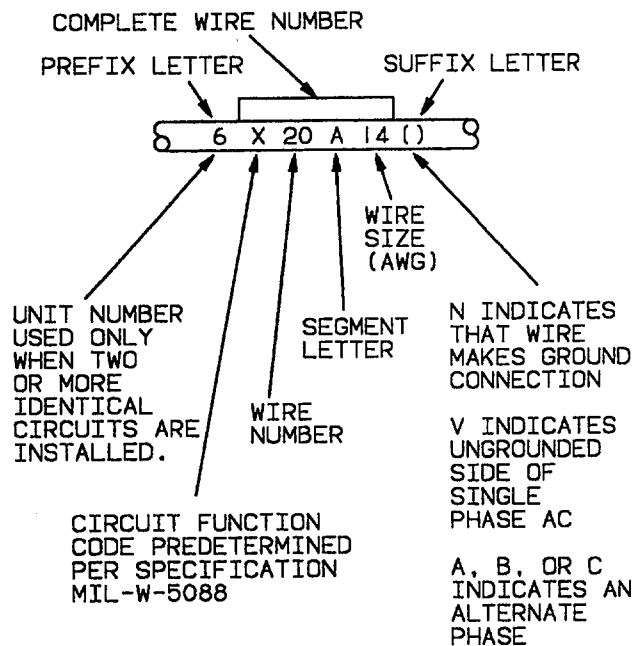

A wire segment is a conductor between two terminals or connections. Alphabetical sequence is usually followed. Wire segment "A" indicates the power source, "B" next segment, etc.

The wire size number is used to identify the size of the wire or cable.

A suffix to the wire identification code (N) identifies any wire or cable that completes the circuit to ground network.

Phase letter "A", "B", or "C", used as a suffix identifies three-phase wiring in AC systems.

The phase letter "V" is used as a suffix identifying an ungrounded wire or cable in a single phase system.

C94CE00F221/3 C

**Wire Codes
Figure 1**

Beechcraft BONANZA WIRING DIAGRAM MANUAL

For thermocouple wire, the following suffixes are applicable:

CHROM	Chromel
CONST	Constantan
ALME	Alumel
COP	Copper
IRON	Iron
ALUM	Aluminum

A list of Circuit Function Designations follows:

A	Armaments
B	Photographic
C	Control Surfaces; automatic pilot
D	Miscellaneous Instruments other than flight or engine instrument; ammeter, landing gear position, free air temperature, cabin pressure, etc.
E	Engine Instrument; fuel flow, fuel quantity, tachometer, synchroscope, etc.
F	Flight Instruments
G	Landing Gear; actuator, retraction, warning, down lock, etc.
H	Heating; ventilating, deicing,
J	Ignition
K	Engine Control; starter, prop synchronizer, etc.
L	Lighting
M	Miscellaneous Electrical; windshield wiper, etc.
P	DC power
Q	Fuel and Oil; fuel valves, fuel pump motors, throttle control, oil pumps, etc.
R	Radio; RC-radio command, RM-marker beacon, etc.

S	Radar; SA-altimeter, SS-search, etc.
T	Special electronics; TK-telemetry, TR-receivers, etc.
U	Miscellaneous electronics (other than R, S or T)
V	DC power for AC systems
W	Warning and Emergency
X	AC power
Y	Armaments special systems

GENERAL NOTES

- This is a point-to-point drawing only. Wire routing or parts callouts are not shown.
- Wires are connected on terminal boards and bus bars in the same positions shown schematically.
- The wiring diagrams contained herein are shown with aircraft power "OFF", control surfaces streamlined, and weight on the landing gear. Any deviation from the preceding conditions shall be so noted on the individual sheets.
- Use of an underline below a pin letter denotes a lower case letter. Example: A=a B=b etc.
- All connector inserts on charts are shown from the back of the connector.
- The abbreviation "BS" is used for "Bonding Strap".
- The abbreviation "M/W" is used for "Mates With".
- The abbreviation "WW" is used for "Wheel Well".
- The abbreviation "CONT'D" is used for "Continued".
- All components shown on a particular schematic may not be reflected on the accompanying equipment list. Only those components which apply to the specific chapter title are listed. To locate a component part number not listed with a specific schematic, refer to the Reference Designator Index for the chapter in which the component part number can be found.

BONANZA
WIRING DIAGRAM MANUAL

APPROVED WIRE TYPES

Use only approved wire types when performing electrical maintenance or modification on the BEECH-CRAFT Bonanza. If replacement of a wire segment is required, use only wire of like type and size. If the type cannot be determined, contact the Customer Support Department of Beech Aircraft Corporation.
