## AEROFICHE EXPLANATION AND REVISION STATUS

The parts catalog information in this set of Aerofiche cards is arranged in accordance with general specifications of Aerofiche adopted by the General Aviation Manufacturer's Association

Conversion of Aerofiche alpha/numeric code numbers:

First number is the Aerofiche card identifier

Letter is the horizontal line reference per card

Second number is the vertical line reference per card

Example: 2J16 = Aerofiche card number two of given set, grid location J16

A Table of Contents is located at grid 1A8

## REVISIONS

The information in this Aerofiche Parts Catalog is kept current by revisions distributed periodically. These revisions supersede all previous revisions, are complete Aerofiche card replacements, and supersede Aerofiche cards of the same number in the set.

Revisions to this PA-18-150 Super Cub Parts Catalog (761 823) issued June 27, 1988 are as follows

Effectivity	Publication Date	Aerofiche Card Effectivity
ORG880627	August 15, 1988	1

NOTE Consult the Customer Service Information Aerofiche for current revision dates for this manual

# INTRODUCTION

This illustrated parts catalog provides simple but positive identification of replacement parts for the Piper Super Cub PA-18-150, manufactured by Piper Aircraft Corporation of Vero Beach, Florida

— WARNING —

Do not use this catalog for rigging or installation purposes

- 1 The catalog is divided into eleven major sections as follows:
  - a Sections I to X inclusive contain all replacement parts for the complete airplane. Each section is subdivided and each division includes an illustration and a parts listing.
  - b Section XI is the Miscellaneous Group. This group includes a listing of the Optional Equipment Kits.
- 2 The following is a brief explanation of the columns in the parts listing:
  - a The FIGURE AND INDEX column indicates the illustration figure number and its parts index number. Example: (2-1), the 2 is the figure number and the 1 is the index number. The figure number appears only at the top of each parts listing page or at the beginning of each new parts listing.
  - b The PART NUMBER column contains the identifying number of the replacement part. This number must be shown on all parts orders.
  - c The CODE column indicates special uses of the part. An explanation of the letter code is shown on the CODE EXPLANATIONS page.
  - d The NOMENCLATURE column indicates the part name. This name must be shown on all parts orders.
  - e The NO REQ column represents the total quantity of parts used per aircraft per figure when the part is not indented and the quantity of parts used per assembly when the part is indented. The symbol AR listed in this column means "As Required".
  - f The SERIAL NUMBERS AFFECTED column indicates the part application by airplane serial number.

Figure and Index Number	Part Number	Code	EXAMPLE NOMENCLATURE	No. Req.	SERIAL NUMBERS AFFECTED
			DOOR ASSEMBLY - Baggage compartment	1	
			* FRAME ASSEMBLY - Baggage compartment door	1	
			* * HINGE ASSEMBLY - Baggage door	1	
			* * CLIP - Baggage door spring	1	

This listing is interpreted as follows:

If the DOOR ASSEMBLY (not indented) is ordered, it will include the three items listed under DOOR ASSEMBLY.

If the FRAME ASSEMBLY (indented one space) is ordered, it will include the two items listed under FRAME ASSEMBLY.

If you want only a HINGE ASSEMBLY or CLIP, you order only that item.

- 3 Optional equipment items are contained in the parts list in their proper sequence and sections. These items are not marked optional, since they are fully identified by their descriptions.

## HOW TO IDENTIFY A PART IF YOU KNOW WHAT IT LOOKS LIKE AND KNOW WHERE IT IS LOCATED

- 1 Refer to Figure 1 to determine the section number in which the part is located
- 2 Refer to the Table of Contents and locate the section. Note the figure numbers that illustrate the various subgroups of this main section. Select the figure title you think might contain the part you wish to identify and turn to the grid (page) specified
- 3 Find the part on the illustration and note the index number  
  
NOTE: If you don't find the part on this illustration, try another figure in this group
- 4 Refer to the "Figure and Index Number" in the parts listing for complete description of the part

## HOW TO ORDER PARTS

When ordering parts, please observe the following instructions:

- 1 Place your order with your local distributor or service center
- 2 Specify the model and serial number of your airplane
- 3 Specify part number, name, type and quantity required
- 4 Specify the method of shipment - freight, express, parcel post, air express, air freight or air parcel post. Where the nature of the shipment requires it or when no instructions are given, we reserve the right to ship the most suitable way
- 5 Request price and delivery information prior to order placement.

## GENERAL INFORMATION

- 1 **Shortages**  
All orders are checked before leaving our shipping department. A packing slip is enclosed with the shipment. Claims for errors or shortages must be made within three days after receipt of orders
- 2 **Returned Goods**  
Please do not return material to us without securing our written permission. Material returned to us without notice will be held at the owner's risk for thirty days and will then be disposed of as we see fit  
  
NOTE: Transportation charges must be prepaid on returned goods or the shipment will be refused
- 3 **Transportation Liabilities**  
The Piper Aircraft Corporation cannot be held liable for damages to parts in transit from the factory. If a shipment is received in a damaged condition, have the delivery man or transportation company make a notation of the damage and file your claim with the carrier. In case of concealed damage, do not attempt to remove the part from the shipping container, or try to repair the damage. Call the carrier and have their claim agent inspect the damage before filing your claim with the carrier
